1. Project Overview & Work Scope

The Contractor shall furnish all labour, tools, equipment, and fixings necessary to position and securely anchor three (3) pre-assembled public benches directly onto existing concrete pads within the village of Clavering.

3 benches purchased and located at Bower House Clavering.

Primary Tasks:

Contractor to pick up benches,

- Inspection and surface cleaning of existing concrete bases at each designated site.
- Transport/handling and precise positioning of pre-assembled benches.
- Drilling of mounting holes into existing concrete pads.
- Secure installation using heavy-duty anti-tamper anchor bolts.

- Site tidy-up and removal of installation waste.

Features / Specifications

Stanford Seat complements heritage designs around parks and urban spaces.

It is traditionally styled with 100% recycled cast aluminium ends and a choice of three recycled material slats.

The seat is ideal for siting in coastal areas or on the sea front. The frame is manufactured from mild steel with an Armortec® Coating, which combines with cast aluminium seat ends to ensure the Stanford Seat offers a long service life.

Personalised polycarbonate plaques can be supplied with your name, message or logo to fit the rectangular recessed area on each seat end. A personalised circular polycarbonate plaque can also be fitted to the seat.

Concrete surface fixing bolts come as standard.

Optional Memorial Plaque:
A memorial plaque, with your choice of dedication, can be supplied with this product. It is ideal for outdoor environments and will keep its appearance for many years with minimal maintenance.
The process offers great flexibility for your message and can even include simple graphics.
When you place an order, we will produce a computer visual that will be sent to you to ensure the wording is exactly how you want it. Once we receive your approval, your plaque will be created as quickly as possible.

This product is fully recyclable at the end of its life providing any stickers or graphics have been removed.

Design Features

- 100% recycled aluminium seat ends.
- Traditional styling.
- Rigid steel frame.
- Vandal-resistant robust design.
